## STATEMENT OF METHODOLOGY

The information presented in this report was collected and assembled from a combination of original research and secondary sources. This section summarizes the methods used in gathering the data.

## Sources

The survey data is collected on a quarterly basis from participating apartment managers, management companies and owners. All information collected from individual complexes is completely confidential and only aggregate statistics are reported. The information furnished by the survey participants is considered reliable. However, the Survey Committee makes no warranty as to the reliability of the data and assumes no legal responsibility for the use of the data from the survey.

## Survey Criteria

The projects have 80 units or more in the Reno/Sparks service area;

- Projects reflect market rents. Affordable Housing, Student \& Senior Housing Projects are excluded;
- New projects have reached a stabilized occupancy of at least 90\%;
- The projects have a competitive on-site management program; and
- A willingness of the on-site manager to participate in the survey.

The results of this survey depict the operating conditions of the average of 23,694 units reported. A total of 95 projects were surveyed. We believe the statistics presented here are representative of the overall conditions of the Reno-Sparks Survey Area.

## Survey Modifications

Two new projects, Lyfe at the Marina and Waterfront at the Marina, reached stabilization during the $1^{\text {st }}$ Quarter 2020 and agreed to become survey participants. The total apartment projects participating in the survey increased from 93 projects to 95 projects, and the total units increased from 23,205 units to 23,694 units.

## COVID-19 IMPACT

At the present time, the impact of the Covid-19 Pandemic on the real estate market is unknown; however, it is anticipated to have a significant effect. In an effort to control the spread of the virus, the Federal Government has issued social distancing guidelines, and a majority of states have issued stay at home directives, as well as mandatory closures of nonessential businesses, schools and universities. The Pandemic has caused a significant decrease in business activity and a dramatic increase in the unemployment rate. As a result, the U.S. Congress recently passed legislation providing substantial financial aid to most businesses and individuals. Although this legislation is intended to minimize the economic impact, it is unknown which segments of the market will be adversely affected.

Nevada Governor Steve Sisolak has placed a moratorium on tenant evictions during the Covid-19 Pandemic. According to Rita Greggio, a lawyer with Washoe Legal Services, nocause evictions, evictions for nonpayment of rent, even lease violations, are not going to be heard by the courts at this time, and landlords are prohibited from serving eviction notices. When the moratorium is raised, rent will still be due for the affected residents; however, late fees cannot be assessed. While it is unknown exactly how this will impact the multi-family market, we can speculate that there may be an increase in vacancies in the coming quarters which may lead to decreases in average rental rates. Additionally, it is likely that rent abatements and other concessions will become more prevalent in the upcoming quarters.

## ECONOMIC OUTLOOK

According to the Nevada Department of Employment, Training and Rehabilitation’s (DETR) March 2020 economic report, employment in Nevada is down 4,900 jobs over the month but up 10,600 over the year, a growth rate of $0.8 \%$. This marks the first time since August 2011 that Nevada has grown at a rate under $1.0 \%$. The state's unemployment rate is $6.3 \%$ this month, up $2.7 \%$ from February and up $2.2 \%$ when compared to last March.

DETR's report also notes that Nevada's Unemployment Insurance claims saw an increase of 199,482 claims, or 2,125\%, from the same month a year ago. Initial claims are at an all-time high and are nearly six times the previous high set in December 2008, when the State saw 36,414 initial claims.
"This month's report shows the earliest effects of the COVID-19 pandemic on Nevada's economy. Even with a significant increase in unemployment and slowdown in employment growth, it is important to note that our employment and unemployment data is measured the week that includes the 12th day of the month. In March, the week of the 12th was the week before the closure of non-essential business and government offices in Nevada, and therefore does not yet capture what has happened in the economy since then. Even so, the March unemployment rate was the highest it's been in nearly 5 years and employment growth was the slowest it's been in almost 9 years. When data for April is released next month, it will reflect the situation this week and we expect trends will decline significantly. Unemployment insurance claims are at an all-time high and weekly claims and payments will also increase as further claims come into the system. As the situation evolves, we will continue to focus on unemployment insurance activity, and post information on our website, NevadaWorkforce.com" said David Schmidt, Chief Economist for DETR.

## Additional March 2020 Economic Report Highlights:

- Total employment rose by $0.8 \%$ over the year, growing at the low end of the range seen over the last year ( $0.8 \%-3.1 \%$ ).
- Construction added the most jobs out of all sectors, for the 12-month period ending in March 2020, increasing by an average of 6,500 jobs over the same time in the year prior.
- Nevada's seasonally adjusted employment growth realized 111 consecutive months of year-over-year gains this month.
- This marks the second time since July 2012 that Nevada has grown at a slower rate than the national average.
- The unemployment rate is the highest it's been since December 2015, nearly five years ago.
- Initial claims are at an all-time high, totaling 208,869 in March.
- Nevada is now ranked ninth in the country in terms of states with the largest percentage increase in unemployment claims from January to April 2020.

## COMMENTARY

The overall average rental rate for all units surveyed increased by 1.28\%, with all unit types except two bedroom/one bathroom units experiencing a slight increase in average rental rates. Additionally, six of the eleven sub-markets experienced an increase in average rental rates, while the West Sparks/North Valleys, Southwest Reno, Airport, Lakeridge and Southeast Reno sub-markets experienced slight decreases.

The overall vacancy rate for all units surveyed decreased by 45 basis points, with seven of the eleven submarkets showing decreases in vacancies. One bedroom/one bathroom units, two bedroom/one bathroom units and two bedroom/two bathroom units experienced decreases in average vacancies, while studios, three bedroom/two bathroom units and townhomes experienced increases in average vacancies. Average vacancy for all unit types is now at 3.51\%.

Over 4,000 apartment units are currently under construction in the Reno-Sparks market, with over 5,000 units in the planning stages. Due to the Covid-19 Pandemic, it is likely that development of planned units will be delayed in the short-term, until the ultimate impact of the Pandemic is known. It is likely that vacancy rates will begin to increase once eviction moratoriums are lifted in the future. Rental rates, which have continued to increase since the last recession, will likely begin to stabilize, and ultimately decrease over the next several quarters.

## GUIDELINES

The units reported in the survey are subject to the following conditions:

- Occupancy rates represent conditions as of the date of survey;
- Rents utilized in the report represent the base price of an unfurnished apartment;
- Units with more than one size per unit type were calculated on a weighted average for each unit type
- Weighted averages were used in all charts to give the most accurate statistics possible. The averages were weighted by the number of units reporting each data type;
- Vacant units are defined as those units currently available for lease (no contract in place).

## RENT CONCESSIONS

During the $1^{\text {st }}$ Quarter of $202027.37 \%$ of the apartment projects in our Survey offered rent concessions, which increased from $23.66 \%$ in the $4^{\text {th }}$ Quarter of 2019. Concessions range from discounted move-in costs to reduced rent on a twelve-month lease. A majority of the properties now offering concessions, are offering a discount to Tesla and other Tahoe Reno Industrial Center employees. The most commonly found rent concessions consist of:

- Reduced rent with or 12-month lease

The chart below summarizes the percentage of projects which have offered concessions, and the overall vacancy rate, between 2014 and a current date. It is recognized that an increasing number of apartment projects are utilizing YieldStar, and concessions are not reported separately by the apartment managers.
